

Line sizes: 5-6 **Capacity:** WF6 + 50 m backing **Weight:** 5.2 oz **Spare spool:** £9.99 **Other sizes:** GLA 80 (3-4) £29.99; GLA 100 (7-8) £34.99

Description: Frame and spool are made from graphite/nylon compound, adjustable disc drag, clicks both ways, supplied in cloth bag.

Comments: Very similar to the Snowbee Classic – its moulded body and reel foot are almost identical – but it is £3 more expensive. The drag is excellent – it is smooth and can be minutely adjusted and is entirely enclosed, so it is less susceptible to grit. The GLA has a good large arbor and the spool is released slowly via a nut, which – unlike the Classic – comes away completely and could be dropped and lost. It is a good-looking reel with a nice pimpled handle and grooved drag knob and has an attractive strong-sounding click.
