

GREYS GRXi XTREME

The Greys GRXi Xtreme clothing range is one of the most attractive and practical ranges we've seen. Readers of CF will be most interested in the full-length Jacket, wading jacket and the overtrousers.

The first thing to reveal is that this range isn't cheap with the full length jacket retailing at about £180.00. However, the quality and performance is right up there with the best of them so you are getting good value for money.

Manufactured from an attractive dark green waterproof, breathable fabric, with additional reinforcing in a lighter olive fabric, all GRXi Xtreme clothing is fitted with the very best YKK zips with metal (not plastic) pullers which indicates that quality and longevity are high priority. As you would expect all seams are taped and heat-sealed to prevent water ingress.

Another essential feature on all extreme weather garments is the ability to tighten and seal the sleeve cuffs. The Greys clothing uses an internal Neoprene cuff and an external Velcro adjustment flap which is one of the best combinations we have seen.

Both jackets and the overtrousers are mesh-lined for comfort and have a generous cut that enables good movement and an additional warm undergarment to be worn in cold conditions. Jackets also have a hood that has a wired peak for good visibility.

Wire Peaked Hood

The permanent hood has an adjustable wired peak for better visibility.

Reinforced Pressure Areas

Shoulders and elbows have an additional layer of material for robust performance.

Pockets

Both jackets have a good range of pockets.

Cuffs

The adjustable cuffs are some of the best we have ever seen.

Overtrousers

Reinforced and slightly padded knee area for longevity and comfort.

Leg Opening

Reinforced at the back to reduce scuffing and with Velcro strap and zip for easy access.

What We Think

The Greys GRXi Xtreme is a top quality range of clothing that offers an excellent combination of performance, skilful design and good looks. Both of the jackets are well-designed and although historically wading jackets have been used by game anglers we think they are a great design for mobile specialists - especially when paired up with the overtrousers. The overtrousers have braces like a bib & brace for comfort and are certainly worth their cost of approx £130. The full-length jacket costs approximately £180 and the shorter wading version approximately £130.

Custom-finished Greys press studs are solid.

Overtrousers have easy access opening.

Zips are YKK with tough metal pullers.

Neoprene cuffs and Velcro adjustment.
